

Company description

The Pakistan Environment Trust (PET) is a non-profit organization working towards tackling Pakistan's toughest environmental challenges. We partner with leaders from business, finance, government, and non-profits to deliver initiatives that are enabling the transition towards a climate-resilient, low-carbon, and biodiverse Pakistan.

Please see [our website](#) for further details about our organization.

Position description

We are currently looking for exceptional candidates to take on the role of Programme Analysts, who will work closely with the respective programme teams to deliver on outcomes.

Duties and responsibilities for the Programme Analyst will include:

- Liaise with local and international stakeholders, including governments, corporates and NGOs to:
 - communicate programme progress, outcomes, and impact through reports, models and presentations
 - expand our current client base of large-scale producers, renewable energy projects and carbon project owners
 - set up pilot projects, oversee scale-up and monitor impact
- Assist in developing and implementing programmes to advance the organization's goal of creating voluntary carbon markets in Pakistan.
- Conduct research and analysis to support program planning and decision-making.
- Facilitate communication and collaboration between stakeholders to drive progress towards net-zero goals.
- Support project planning and management, including budget tracking and project reporting.
- Contribute to the continuous improvement of programmes and initiatives through monitoring, evaluation, and reporting on results.
- Develop bottom-up business cases for decarbonization and carbon market projects in pipeline based on information collected via field research and subject-matter experts.
- Oversee registration and accreditation processes of new clean-energy and carbon projects.
- Stay informed of developments and trends in climate change and the carbon market and recommend new and innovative approaches as appropriate.

Experience and qualifications

This is an extraordinary opportunity for an individual to work at an organization that is transforming Pakistan's ability to preserve its environment and tackle climate change. We expect our ideal candidate to have the following experience and qualifications:

- Strong bachelor's degree in a relevant field (e.g., economics, finance, engineering) from a reputable university.
- Excellent writing, communication and quantitative skills with the ability to drive solutions for complex problems.
- Ability to work independently and in a team setting.
- Ability to take ownership of time-sensitive projects and collaborate effectively with cross-functional teams.
- Familiarity with climate change, international development and impact investment is preferred.

Additional Details

Applications will be reviewed on a rolling basis, so applicants are encouraged to apply immediately. The successful candidate will be offered a competitive salary, with flexibility on location and working set-up.

To apply for this role, please fill out the application form [here](#).
